Report Comments

This report is unique to a teacher (instructor or TA) and class. If the class sections have been merged together, there may be multiple sections represented in this data.

The response statistics at the top of this report show both course and teacher response counts.

The course and teacher response rates can be different, particularly if the course has multiple instructors/TAs. Sometimes students respond to the course questions but not the instructor/TA questions, or students skip the questions for this particular instructor/TA.

Comments
because
Anytime I had a question about anything the professor was quick to respond and was very helpful!
Occasionally by asking questions throughout zoom but still dragged and was rushed through topics making it difficult to respond.
The instructor made the course simple
She was always there for me when needed. And I had a lot of struggles with my computer and she would help me with it.
The instructor helped me feel engaged with the course "somewhat frequently" because she was basically explaining the definitions but there was not a lot of time to solve example questions in class.
good
